NAME

curl_formfree - free a previously build multipart/formdata HTTP POST chain

SYNOPSIS

#include <curl/curl.h>

 ${\bf void\ curl_formfree}(struct\ curl_httppost\ *form);$

DESCRIPTION

curl_formfree() is used to clean up data previously built/appended with *curl_formadd(3)*. This must be called when the data has been used, which typically means after the *curl_easy_perform(3)* has been called.

RETURN VALUE

None
